Electricity recap

Name _____ Class _____ Date _____

Across

3. Meter connected in series to measure current. (7)

5. Two negatively charged objects do this. (5)

6. Complete path needed for a steady current. (7)

7. Particle in the nucleus with no electric charge. (7)

8. Particle transferred when an object becomes charged. (8)

9. Equal numbers of protons and electrons make an atom ___. (7)

Down

1. A positive charge and a negative charge do this. (7)

2. Charging by ___ transfers electrons when materials rub. (8)

4. Positively charged particle in the nucleus. (6)

6. Rate at which charge flows. (7)
